

Latest Upcoming International Event

28/04/2026, Rixos Premium Hotel Dubrovnik

Energy Security and Small Modular Reactors for 3SI's Critical Infrastructure & New Economy Emergency

- New Partnerships in Innovation, Finance & Security for The Three Seas Initiative in Central & Eastern Europe
- New Projects (FOAK Market Ready) for Sovereignty, Systems & Supply Chain Opportunities
- SMRs & CleanFirm solutions for AI, Data Centres & Reindustrialisation
- Facilitation & Cooperation across Existing and Embarking Nuclear States; On and Off Grid SMR Project Acceleration and Standardisation

TUESDAY 28th APRIL 2026, 9.45 AM - 6.45 PM

INVITATION

Dear Sir/Madam,

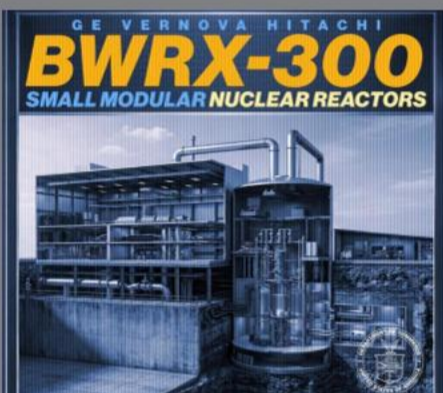

You are invited as a **Non Speaking Passive Roundtable Participant** to a 3 Seas Initiative side event

At

The Rixos Premium Dubrovnik

Liechtensteinov put 3, 20000, Dubrovnik, Croatia

Roundtable & Panel Discussion

Energy Security & Small Modular Reactors for The 3SI's Critical Infrastructure & New Economy Emergency

- New Partnerships in Innovation, Finance & Security for The Three Seas Initiative in Central & Eastern Europe
- New Projects (FOAK Market Ready) for Sovereignty, Systems & Supply Chain Opportunities
- SMRs & CleanFirm solutions for AI, Data Centres & Reindustrialisation
- Facilitation & Cooperation across Existing and Embarking Nuclear States; On and Off Grid SMR Project Acceleration and Standardisation

As the war with Iran triggers an acute oil and gas crisis, Europe faces an impending energy emergency: surging prices, a steep demand gap, a deepening cost-of-living crisis, and accelerating deindustrialisation. Small Modular Reactors (SMRs) and Advanced Modular Reactors (AMRs) offer the only scalable, firm, low-cost solution to restore energy security, enable reindustrialisation, power AI data centres, and support small and medium-sized businesses.

Their modular design, factory-built standardisation, and rapid deployment timelines deliver reliable, dispatchable power that complements renewables while slashing long-term costs. This creates an efficient economy with more evenly distributed wealth through affordable energy for industry and households alike. For the Three Seas Initiative, SMRs are critical infrastructure for the new economy emergency. First-of-a-kind (FOAK) market-ready projects open sovereignty, supply-chain, and systems opportunities. CleanFirm nuclear solutions will anchor AI data centres and reindustrialisation across Central and Eastern Europe.

The United States 🇺🇸, Canada 🇨🇦 and the UK 🇬🇧 leads in SMR technology and regulatory innovation. This 3SI special side event Roundtable & Panel discussion is focused on building on the decades long experience of their regulatory, technical national laboratories expertise, with the day's goal being to bring about new projects by leveraging greater facilitation and cooperation between existing mature nuclear states and the politically motivated embarking ones.

In the region, Croatia, Estonia, and Poland (embarking nuclear states) join Hungary, Slovenia, Romania, Bulgaria. Bulgaria and other existing nuclear nations to accelerate on and off grid deployment by driving new projects through sharing new methods of technical fluency on standardisation, harmonisation, innovative business models, licensing and use of PPP/PFI instruments, shared between new "opt in" country collaborations and groupings working with the same vendors, that enable greater efficiencies, for investors to realise earlier returns and ratepayers to benefit from reduced energy costs quicker than the current renewables regimes allow.

The Program

Roundtable & Panel Discussion

SMR Deployment, Ai and its Security Architecture

At

The Levantera Room

In Partnership with United States Nuclear Industry Council

Date: 28/04/2026, 11am-6/7pm

Venue: Rixos Premium
Liechtensteinov put 3, 20000,
Dubrovnik, Croatia
